NOTICE OF END-OF-LIFE

Dear Valued Customer,

MaxOptix has decided to cease manufacture of all MaxOptix magnetooptical (MO) drives. These drives include T5 -2600 2.6GB Internal Star, TMT5 -2600 2.6GB External Star, T65200 5.2GB InternalStar and TMT65200 External Star drives. Key components required for the manufacture of our MO drives have become obsolete. Based on our current business and the overall MO market we have decided not to invest in further research or development of new MO drive design.

All future orders must be non-cancelable and non-returnable and received by December 31, 2003. All products ordered will ship by February 27, 2004. MaxOptix will provide In-Warranty/Out-of-Warranty support for five years. We apologize for the extreme inconvenience and hope that you will continue to use other products from MaxOptix.

MaxOptix will continue to offer other quality optical products like MaxOptical Brand Certified MO media.

Sincerely,

Phil Pascarelli
President
